

Components Care Center

A Comprehensive Service Provider

Empowering Technologies

Cummins offers a range of next generation component technologies delivering integrated solutions for air handling, fuel and aftertreatment systems that address challenges faced by engine manufacturers across the globe. With expertise demonstrated across the critical engine components including turbochargers, filters, fuel systems and aftertreatment systems, Cummins' unique position provides industry leading component technologies and systems that meet the ever increasing demands for efficiency, durability and optimized performance.

Components Care Center:

Encompassing Change

With new emissions standards owing to extended care for the environment, we at Cummins, also extend our boundaries to serve our customers “on the go”.

With increasing complexities in BSIV electronic engines, aftertreatment system, fuel system, On-board Diagnostic (OBD) requirements and engine brakes; Cummins ensures a highly capable and responsive service network to maintain best in class after-sales service and support to our customers.

We bring to our customers, a one stop solution to fulfill sales and service related requirements for all Cummins Components - the Components Care Centers (CCC). These are special care centers exclusively for the entire range of Cummins components - a first of its kind in India.

Equipped with world-class laboratories, dedicated workstations with latest technologies and technicians on site, these Centers will cater to all components service requirements for BSIV and BSVI emission norms.

On the job technicians will be equipped to provide prompt solutions to any service request using the latest support technologies. They will be trained with our agile training programs devised as per the changing norms and requirements.

Why Choose Cummins Components Care?

- Experts with advanced technical training
- Latest support technologies
- Unmatched network of aftermarket support
- Unparalleled service quality across the country
- A comprehensive solution for all component related services for BSIV and BSVI emission norms

More than Simple. It's Inclusive.

Components Care Center Service Portfolio includes

Sales of New and ReCon Parts

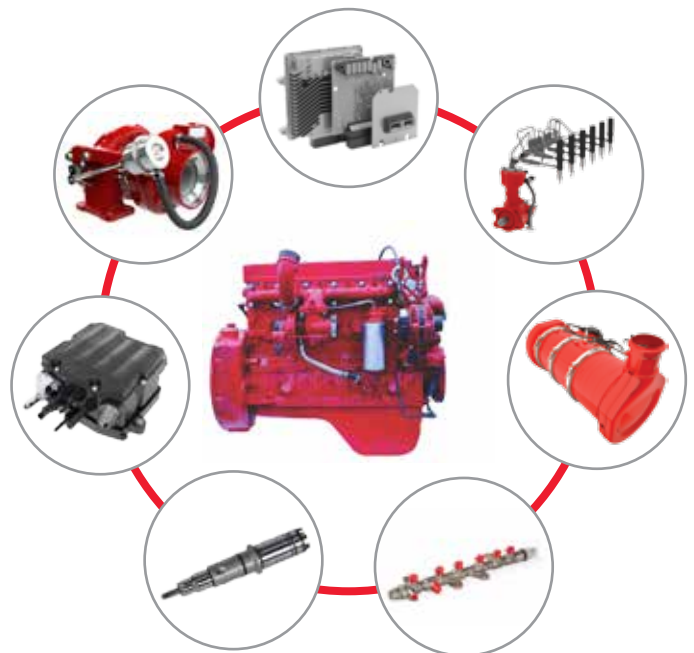

Repair Services

Warranty Management

Our product scope includes components for Aftertreatment, Air Handling, Fuel Systems and Electronic Controls

A Perfect Service Partner

What We Offer?

Timely Service & Repair of Components:

We offer repair facility to serve the entire product portfolio of Cummins Components. CCC takes an extra step to deliver faster, easier and better customer service with zero compromises. Coming closer to the customer is our primary focus and our wide network helps us achieve this, thus catering to issues on time with no delay.

Warranty Administration

With our on-field adjudication, warranty information is readily connected with your equipment's service history, minimizing delays, maximizing up-time and leading to more accurate settlements for both customers and service providers. We offer to service components within and beyond warranty.

New & Recon® Parts Advantage

CCCs provide an exhaustive offering of components for BSIV engines. With every ReCon® part that you choose to buy, we offer you best in class warranty across all our centers. This gives you an assurance that your engines are taken care of, when you are "on the go".

Customer Support

Infant Care Support for New Product Launches

We offer infant care support to newly launched BSIV engine components. This shows we care for our valued customers and take full ownership of our world-class products.

Every™ Part. Genuine.

Genuine Cummins Parts deliver improved performance and longer life. Cummins constantly improves the performance characteristics of its engines through its ongoing investment in research and development. As improvements are made, they are incorporated into Genuine Cummins Parts.

Genuine Cummins Parts:

- Meet exact Cummins specifications
- Utilize advanced materials
- Incorporate state-of-the-art Cummins design technology
- Are continually improved
- Have an industry-leading warranty
- Are backed by a best-in-class nationwide service network
