Cummins 6B ReCon long Block

*For BSNL / MTNL lines

Cummins ReCon Long Blocks

When it's time for a major overhaul, Cummins ReCon long blocks are the first choice for people who never settle for second-best.

A Cummins ReCon long block is a high quality alternative which reduces downtime and helps the customer save money by using a greater portion of the existing components.

Cummins 6B ReCon Long Blocks

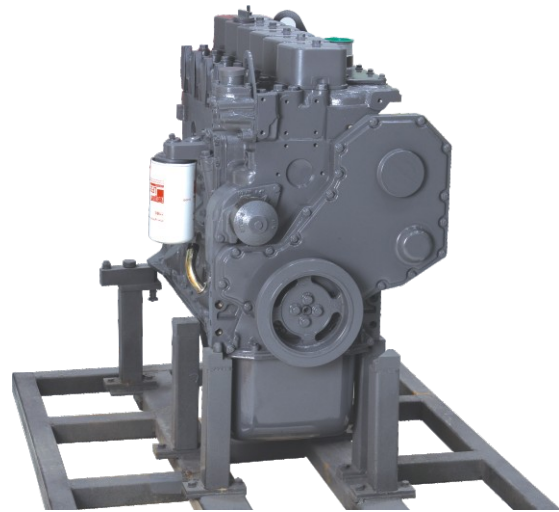

Part No.	Application
Ro1001399	Generator/Industrial
Ro1006662	Automotive 235HP
Ro1013369	Automotive 180HP
Ro1013393	Automotive 180HP BSIII w/o Injector
ROLB13524	Automotive 180HP BSIII with Injector

Features and benefits of ReCon long blocks

- Value for money – Cost-effective means of extending the life of Cummins-powered equipment
- Reduced total cost of ownership as compared to repair since there are no hidden costs attached to the product
- Genuine factory remanufactured product updated to the latest Cummins specifications
- Best-in-class warranty
- ReCon long blocks allow reuse of external components such as the fuel pump, turbocharger fuel lines, lift pump, air compressor, starter and alternator
- Eco – friendly remanufacturing process

Dealer name and address

Remanufacturing Process

- Cummins ReCon blocks are manufactured using state of the art computer controlled torque and angle equipment
- ReCon blocks are assembled on sophisticated modern industrial flow line assembly track similar to the ones used to assemble new blocks
- Customized simulated test machine ensures the integrity of all fluid and air systems in the long block
- The major components such as cylinder block, crankshaft and camshafts are inspected for cracks using magnetic particles
- Components such as bearings, gaskets, rings, bushings, seals and fasteners are all replaced with new parts

Cummins Core Policy

Cummins Core Policy is based on simple visual inspection of the product.
